

SOLUTION OVERVIEW · FORCOMPLIANCE

Compliance platform for consultancies and data protection officers

Track GDPR, NIS2 and security for all your client organisations from the same instance, with each organisation's data kept separate.

SOLUTION

ForCompliance

GDPR, NIS2 and security compliance

AIOBI

Funchal · Autonomous Region of Madeira · Portugal

September 2026

Do any of these problems sound familiar?

Evidence in different files

Each client's records and evidence sit in separate folders and spreadsheets.

Tight notification deadlines

When an incident occurs, gathering the information in time to notify is difficult.

Reports built from scratch

Each client report is put together from the start, with data copied from several files.

Five compliance modules and a common core

Modules to track GDPR, NIS2 and security for each client organisation.

A Client organisations

Portfolio of client organisations, with each one's data kept separate

B Record of processing activities

Processing activities per client, with lawful basis, retention periods and impact assessments

C Incidents and requests

Incidents with GDPR and NIS2 deadlines, and data subject requests with the one-month deadline

D Suppliers and processors

Suppliers, sub-processors, international transfers and contracts

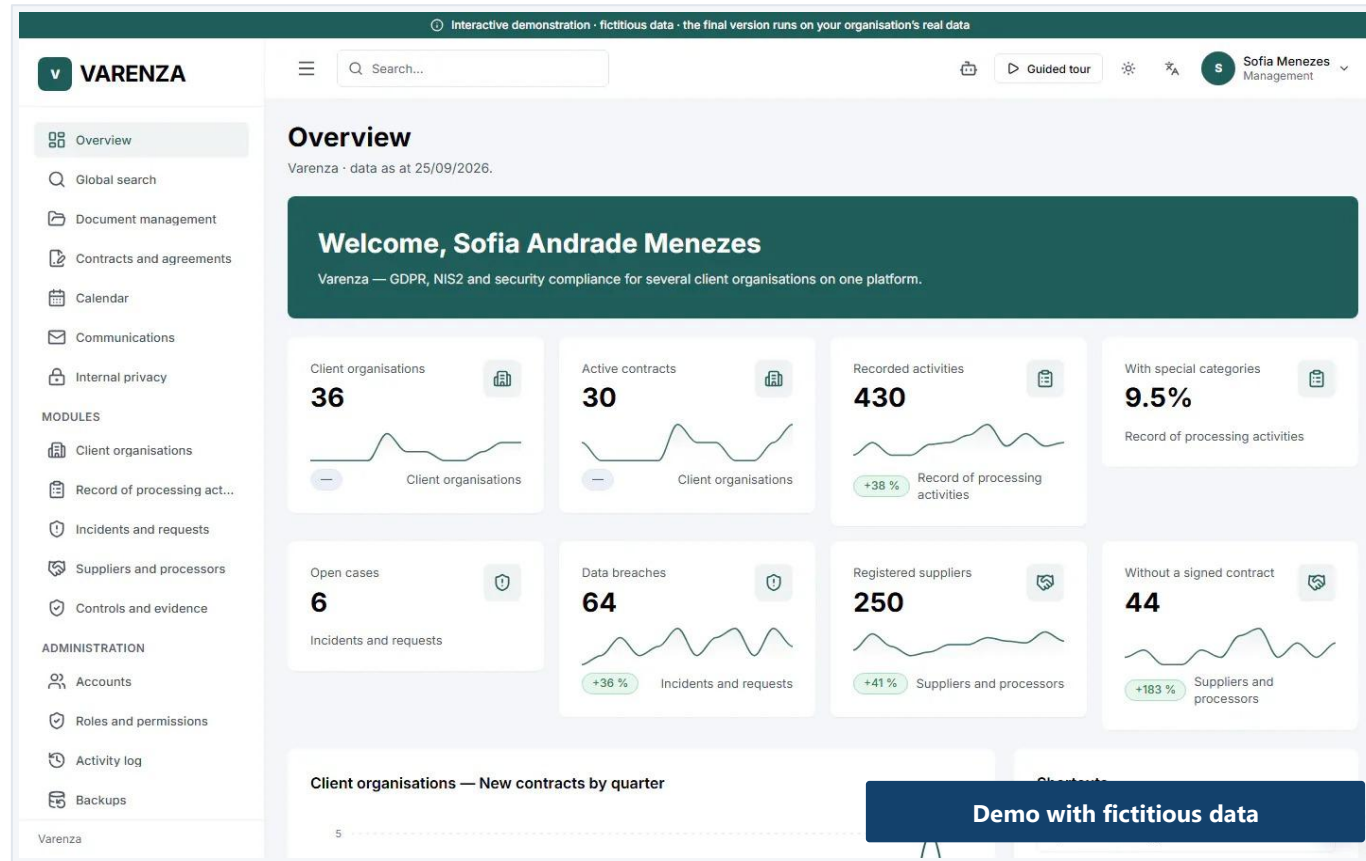

E Controls and evidence

Controls by framework, with evidence and maturity level

Common core

Document management, contracts, calendar, communications, GDPR tools and access profiles, in European Portuguese and British English.

All clients on one dashboard

Indicators for every client organisation, recalculated on the current data as soon as you sign in.

Clients in NIS2 scope, in one filter

Facets by sector, classification and status; here only essential and important entities.

- Each client's NIS2 classification
- Search, sorting and a choice of columns
- Export to CSV, Excel and PDF

Interactive demonstration · fictitious data · the final version runs on your organisation's real data

VARENZA

Overview / Client organisations

Client organisations

Portfolio of client organisations, with NIS2 classification, data protection officer, maturity and risk. Every record on the platform belongs to a client organisation.

[+ New client organisation](#) [Import](#) [Dashboard](#)

Large enterprise 2 (3)	Advanced 3 (4)	Low 4 (7)

Demo with fictitious data

Each client's data, kept separate

The record brings together one organisation's processing activities, cases, suppliers and controls, and only its own.

- The client's processing activities, incidents and requests
- Suppliers and processors
- Controls with their evidence

Demo with fictitious data

The client portfolio on a dashboard

NIS2 classification, maturity, risk and retainers across the portfolio, with filters by sector and service.

AI in everyday work

AI helps to classify, extract data, summarise and send alerts within each module. The demo shows illustrative examples.

Classify incidents

Proposes the category and severity of each recorded incident.

Extract contract data

Reads contracts with processors and fills in each supplier's record.

Summarise impact assessments

Summarises each impact assessment into its main risks and measures.

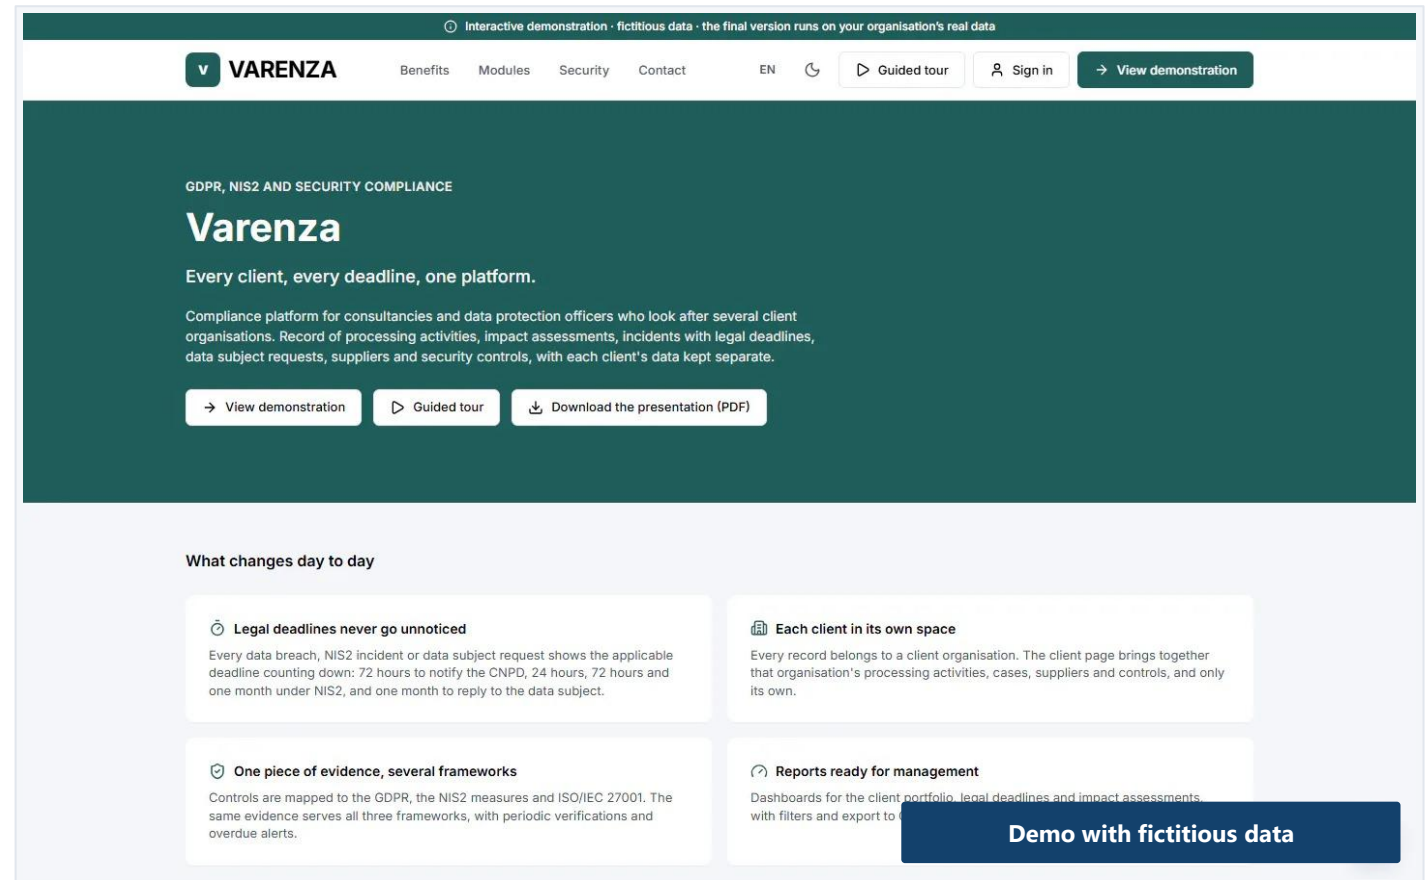

Notification deadline alerts

Sends an alert while there is still time to notify an incident.

A public website under the consultancy's brand

The portal presents the consultancy and its services to clients, under the same brand as the platform.

- Introduction, benefits and modules
- Contact details and access to the platform
- Available as an add-on, listed on the pricing page

How the project works

1

Explore and work out the price

Explore the modules and work out the price for the number of clients you support, before any meeting.

2

We migrate and configure

We migrate your current records and configure the platform with the consultancy's name and logo.

3

Start working

Your team uses AI and dashboards on the platform from day one.

4

Your data stays yours

At the end of the plan, you receive your data in open formats, with a 90-day transition period.

Licence + plan, with published prices

The price depends on the tier, the number of internal users and the number of client organisations managed.

	ForCompliance Essential	ForCompliance Professional	ForCompliance Enterprise	ForCompliance Custom
Who it is for	One department or process	Several departments	The whole organisation, with integrations	Specific hosting, security or design requirements
Internal platform users	Up to 25	Up to 100	Up to 300	To be agreed
Client organisations managed	Up to 10	Up to 40	Up to 150	To be agreed
Industry modules	Base package	Full package	Full package + 2 custom modules	Custom
Data sources migrated	Up to 2	Up to 5	Up to 10	To be agreed
Dashboards	Package dashboards	+ 3 custom	+ 10 custom	To be agreed

Published prices

The amounts for each tier, the add-ons and the calculator are at

aiobi.pt/en/pricing

- Implementation and use licence + monthly or annual plan, which starts when the project is completed and includes a plan on the AIOBI Platform.
- In the private sector, the licence is paid in two parts: half on award and half on completion of the project, with terms of 24, 36 or 48 months. In the public sector, the payment terms are set in the contract.
- At the end of the plan, your organisation's data in open formats, with a 90-day transition period.
